

VISIONS MADE REAL

OKITE

Isn't imagination a wonderful thing?

It's where perfect spaces are born. Where eye-catching combinations of clean lines and flawless surfaces come together in the designs and colours you've always dreamed of. Where everything looks eternally pristine, in an effortless way you never thought possible.

Preserving the purity of those visions is what fires our imagination. It's how we created OKITE. A beautiful all-purpose surface that transforms the most important vision of all – your own project.

OKITE is...

Quite simply, the stuff of dreams. It lights up kitchens, dining areas, bathrooms or any other area of any hospitality, healthcare or other commercial projects. It's a unique compound of resin and up to 93% natural quartz, one of the toughest and most naturally attractive of all minerals.

OKITE is highly heat, stain and scratch resistant and is extremely durable – five times stronger and more durable than granite – and non-porous. It never needs sealing. Plus, it's remarkably easy to clean and maintain.

In short, it's a luxurious material like no other.

ISN'T
IMAGINATION
**A WONDERFUL
THING**

Pure, simple elegance

OKITE has an unmistakably Italian quality that's apparent at first glance. Understated style, you might call it – exquisitely crafted, beautifully finished – to give your home a subtly stunning appeal.

As if that wasn't enough, you also have the enviable choice of a seductive array of colours – immaculately polished or left in an attractively natural honed finish – which can be edged in a variety of ways.

Kinder to the environment & LEED contributing

From sustainably sourced quartz to recycled glass, from our quality-certified cleaner production processes to our continuous quest for more efficient use of natural resources, our commitment to the planet and people is at the heart of everything we do, making OKITE the product of choice for any LEED project. OKITE also qualifies as a "Regional material" fabricated locally within 500 miles from your project.

Versatile. In every possible way

As adaptable as you need it to be, OKITE is ideal for virtually any interior. Practically its only limit is... your creativity.

Available in a choice of thickness, it can be cut with ease into the sharpest of straight lines or sculpted into the most sensual curves. Its exclusive range of collections and colours can be used to arresting effect in your kitchen as easily as in your bathroom, dining area and any other commercial project.

Practical. Because project are for people

Everyday life is never as predictable as you'd like. Your clean surfaces will invariably get dirty. There'll be the occasional spillage and hard objects will be scraped or dropped on them from time to time. It's a good thing then, that the quartz in OKITE is the fourth hardest mineral known to man. OKITE is five times stronger and more durable than granite, making it remarkably tough to scratch. As it never needs sealing, it's also surprisingly stain resistant, offering far higher levels of protection against oil, coffee, wine and soft drinks, for example.

OKITE is also certified as a safe and hygienic product for use in food preparation areas. Its non-porous surface resists staining and prevents absorption of moisture or food which can harbour harmful bacteria. As a result, there's no need to use any protective chemicals, making it safer for you and your family.

Green Guard & NSF compliance

OKITE is certified by GreenGuard Environmental Institute under the "GREENGUARD Standard for Low Emitting Products" and under the "GREENGUARD for Children & Schools product certification programSM", which means OKITE does not emit any gas or VOC (Volatile Organic Compounds). As result, OKITE is much safer than any other surfacing product.

OKITE is also certified by NSF for complying with NSF/ANSI 51. As result, OKITE does not support the growth of mold, mildew and bacteria on its surface.

Quality only true experts can create

OKITE is the culmination of years of intense research, development and refinement from Seieffe Industrie, a long standing family business that's one of Italy's most renowned makers of innovative building products and household surfaces.

Manufactured exclusively at our facility in Montesarchio-Bonea (BN) Italy, and stocked in USA, all OKITE production is undertaken by a team of highly skilled technicians under the watchful eye of Antonio Izzo, the family's eldest son.

As a result, since its launch in 2000, it has redefined quality and environmental standards in its field. And redefined the expectations of discerning consumers and Design Professionals in Italy and around the world.
